

SOUTH AUSTRALIA.

---

ANNUAL REPORT

OF THE

REGISTRAR-GENERAL OF BIRTHS, DEATHS,  
AND MARRIAGES.

1894.

---

ADELAIDE:

BY AUTHORITY: C. E. BRISTOW, GOVERNMENT PRINTER, NORTH-TERRACE.

1895.

# REGISTRAR-GENERAL OF BIRTHS, ETC.—ANNUAL REPORT, 1894.

Office of Registrar-General of Births, &c., July 12th, 1895.

Sir—I have the honor to submit to you the following report on the births, deaths, and marriages registered in the province in the year 1894.

Near the end of the report will be found, under their proper heading, some observations and statistics respecting the Northern Territory; but, with these exceptions, everything stated with regard to the colony, in either the report itself or the tables accompanying it, is to be understood as referring to the southern part of the province only—that is, to South Australia proper.

## POPULATION.

On December 31st, 1894, the estimated population of the province, exclusive of the inhabitants of the Northern Territory and of aborigines, was 347,720, viz., 179,442 males and 168,278 females. This showed an advance of 5,742 on the estimated population at the beginning of the year—an increase which was lower than that of any other year since 1890.

The following table, compiled from the quarterly returns of the Collector of Customs published in the *Government Gazette*, shows the distribution as to route of the recorded immigration and emigration in 1894:—

Route.	INWARDS.				OUTWARDS.			
	Males over 12 years.	Females over 12 years.	Males under 12 years.	Females under 12 years.	Males over 12 years.	Females over 12 years.	Males under 12 years.	Females under 12 years.
By sea.....	27,049	5,044	1,264	1,111	29,109	5,059	1,344	1,060
Via Morgan .....	1,205	292	84	91	826	279	66	64
Via Cockburn .....	7,437	3,618	1,263	1,223	6,681	3,149	1,044	974
Via Serviceton .....	8,643	3,527	297	251	8,262	3,696	383	289
	44,334	12,481	2,908	2,676	44,878	12,183	2,837	2,387

Taken as they stand (that is, without considering an allowance which has been made for unrecorded departures—527 males and 320 females), the figures in the table would show that with respect to persons over 12 years of age the population lost 544 males and gained 298 females, and that in regard to children under that age it gained 71 males and 289 females, the result being a decrease 473 males and an addition of 587 females.

The figures in the table show also that there was a gain of 437 persons *via* Morgan, of 1,693 *via* Cockburn, and of 88 *via* Serviceton, and a loss of 2,104 by sea.

The estimated mean population for the year was 343,625 (177,286 males and 166,339 females), being greater by 7,212 than the mean population of 1893.

Throughout this report and the statistical tables accompanying it the annual rates of births, deaths, and marriages to population are invariably calculated on the mean populations of the years referred to.

## BIRTHS.

The births registered in 1894, numbered 10,476, being less by 207 than those recorded in the previous year. The natural addition to the population from the excess of births over deaths was 6,475, which was greater by 312 than the corresponding increase of 1893. Of the total births registered 5,407 were male births, and 5,069 female, the proportion of the former to 100 of the latter being 106·67, which was considerably above the mean proportion (104·49) of the thirteen years, 1881-1893. In England, according to recent returns, the mean proportion for the five years ended with 1892 was 103·54, while the latest “Victorian Year Book” gives 104·33 as the mean ratio for the Australasian colonies, taken as a whole, the calculation being based on the returns of the four years 1890-93.

In the first quarter the births registered in the colony numbered 2,569, in the second 2,764, in the third 2,650, and in the fourth 2,493, the births of the second and third quarters being, according to the almost invariable rule, more numerous than those of the first and last. The birth rate per 1,000 of the mean population was 30·49, against 31·76 in 1893, and was below the birth rate of any other of the last thirty-five years.

By means of a tabular statement, which will be found later on, and the information in which—like all similar information given in this report—has been taken from the latest and most authentic sources, the birth rate of South Australia can be compared with the birth rates of the other Australasian colonies, the different parts of the United Kingdom, and several other countries.

*Illegitimate Births.*—The births entered in 1894 as illegitimate numbered 320 (178 males and 142 females), against 303 in the previous year. The percentage of illegitimate births to the total births registered during the year was 3·05.

The following table shows the percentages in the seven Australasian colonies and the different parts of the United Kingdom in the years specified :—

	1889.	1890.	1891.	1892.	1893.	1894.	Mean.
South Australia .....	2·47	2·50	2·93	2·93	2·84	3·05	2·79
New South Wales .....	5·33	5·26	5·36	5·71	6·16	6·14	5·66
Victoria .....	4·92	5·09	5·36	5·59	5·46	5·51	5·32
Queensland .....	4·68	4·85	4·65	5·05	4·97	4·52	4·79
Western Australia .....	—	—	—	5·89	4·16	4·66	4·90
Tasmania .....	4·00	4·05	4·05	4·75	4·40	5·09	4·39
New Zealand .....	3·32	3·29	3·49	3·32	3·70	3·80	3·49
England and Wales .....	4·6	4·4	4·2	4·2	—	—	4·35
Ireland .....	2·8	2·7	2·7	2·5	2·6	—	2·66
Scotland .....	7·85	7·54	7·57	7·4	—	—	7·59

For the convenience of reference and of comparison the South Australian rates of illegitimacy for fourteen years are here appended :—

1881 .....	2·25	1889 .....	2·47
1882 .....	2·25	1890 .....	2·50
1883 .....	1·75	1891 .....	2·93
1884 .....	2·10	1892 .....	2·93
1885 .....	2·42	1893 .....	2·84
1886 .....	2·38	1894 .....	3·05
1887 .....	2·49		
1888 .....	2·67	Mean of fourteen years .....	2·50

DEATHS.

The deaths registered in 1894 numbered 4,001, being less by 519 than those of the previous year. The deaths of males were 2,184, and of females 1,817, the proportion of the former to 100 of the latter being 120·20, which was greater by 13·53 than the proportion of male to female births. Of the whole deaths of the year, 1,048 were registered in the first quarter, 1,019 in the second, 972 in the third, and 962 in the fourth, the mortality of the first half of the year being, according to the general rule, greater than that of the second. The death rate per 1,000 of the mean population was 11·64 against 13·44 in the previous year. It was a little higher than the death rates of 1889 and 1892, but, with these two exceptions, it was the lowest on record. It may be stated here that in every one of the ten years, 1885-1894, the death rate was low.

By means of the tabular statement which has already been referred to, and which will be found later on, the death rate of South Australia can be compared with the death rates of the other Australasian colonies, the different parts of the United Kingdom, and several other countries.

*Causes of Death.*—Arranged in their respective classes and numbers, the causes of death in 1894 and the previous year were as follows :—

	1893.	1894.
Specific febrile or zymotic diseases .....	926	605
Parasitic diseases .....	20	13
Dietetic diseases .....	39	32
Constitutional diseases .....	690	700
Developmental diseases .....	479	428
Local diseases .....	1,820	1,765
Violence .....	236	226
Ill-defined and not specified causes .....	310	232

It will be seen from this that, comparing the causes of death in the two years by classes, there was in 1894 a decrease in every class except one—"constitutional diseases"—in which there was a small advance. The remarkable diminution in the number of deaths from "specific febrile or zymotic diseases" was chiefly owing to a large decrease in deaths from measles and in those from whooping cough.

As very full particulars are given in the tables accompanying this report respecting the different causes of death specified in them, it is considered necessary to refer specially here to only some of those in the zymotic class and a few of the other causes.

*Scarlet Fever, Measles.*—There were 35 deaths from scarlet fever, against 5 in 1893, and 28 deaths from measles, against 261 in 1893.

*Whooping Cough.*—There were 60 deaths from whooping cough, against 121 in 1893.

*Enteric Fever.*—The deaths from enteric or typhoid fever numbered 80 (46 males and 34 females), being more by 18 than those registered in 1893.

The following table shows the death rates from this disease per 1,000 of the mean population for the last thirteen years :—

1882 .....	0·51	1889 .....	0·42
1883 .....	0·46	1890 .....	0·30
1884 .....	0·44	1891 .....	0·23
1885 .....	0·43	1892 .....	0·26
1886 .....	0·31	1893 .....	0·18
1887 .....	0·47	1894 .....	0·23
1888 .....	0·35		
		Mean of thirteen years .....	0·35

For comparison it may be stated that in England, according to the recent returns of the Registrar-General, the rate in 1892 was only 0·14, and the mean annual rate for the quinquennium ended with that year 0·17, while, according to the latest “Victorian Year Book,” if deaths from simple and ill-defined fevers (which deaths, however, are rarely more than a few) be counted along with those from enteric fever, the mean annual rates for the Australasian colonies for the five years ended with 1892 were :—

Tasmania .....	0·52	South Australia .....	0·33
Queensland .....	0·52	Western Australia .....	0·31
Victoria .....	0·49	New Zealand .....	0·22
New South Wales .....	0·35		

It would seem, therefore, that in reference to enteric fever the colonies compare unfavorably with England. Only 2 of the deaths from enteric fever were of children under 5 years of age, and only 8 of persons over 45. In the annual report for 1889 it was stated that “As many of the deaths from this disease occurred in public hospitals, and were of persons who had come from a distance—in some cases even from beyond the limits of the colony—and as many others were of persons who had returned ill to their homes from various directions, it would serve no useful purpose to give a minute detail of the local distribution of the deaths.” For similar reasons minute details of such distribution are not given in this present report; but it may be stated that 42 of the deaths occurred in the four districts forming “Adelaide and suburbs” (that is, Adelaide, Norwood, Hindmarsh, and Port Adelaide), only 4 in the districts south of Adelaide district, and the remaining 34 in the other parts of the colony.

It is noteworthy how very few deaths from this disease occur in all that portion of the colony which lies south of the district of Adelaide. From 1887 to 1894 they numbered in each year respectively only 4, 8, 8, 9, 1, 1, 2, and 4.

*Diphtheria, Croup.*—The deaths from diphtheria in 1894 numbered 97 (47 males and 50 females), being less by 3 than those of the previous year, and being the lowest number registered in any year since 1887. The proportion of deaths from this disease per 1,000 of the mean population was 0·28, against 0·30 in 1893. As usually happens, diphtheria continued to claim its victims throughout the entire year, though it was less destructive in the third and last quarters than it was in the first and second. Only 5 of the deaths were of persons over 10 years of age. Judging from the returns of several years, it would seem that, though no age protects a person from liability of an attack from this malady, the mortality from it is chiefly confined to children under 10 years old. Of the total deaths from this disease, 38 were registered in the four districts forming “Adelaide and suburbs,” 5 in the districts south of Adelaide district, and the remaining 54 in the other parts of the colony.

Both in the colonies and in England there seem to be, in many cases, considerable difficulty and uncertainty in distinguishing between diphtheria and croup. Occasionally, therefore, statistical writers count together the deaths from these two diseases. The deaths from croup in 1894 numbered 16 (10 males and 6 females), against 30 in the previous year and 33 in 1892.

*Phthisis.*—The deaths from phthisis were 356 (188 males and 168 females), being more by 16 than those registered in 1893. Of the total deaths from all causes, 8·90 per. cent. were attributed to phthisis, against 7·52 per cent. in the previous year, while the proportion of deaths from this disease per 1,000 of the mean population was 1·04, against 1·01 in 1893. The following table shows the proportions for the last ten years :—

1885 .....	0·99	1891 .....	1·04
1886 .....	1·12	1892 .....	0·94
1887 .....	1·16	1893 .....	1·01
1888 .....	1·19	1894 .....	1·04
1889 .....	0·94		
1890 .....	0·94	Mean of ten years .....	1·04

In England the proportion in 1892 was 1·47, not only being less than the mean annual rate (1·58) for the quinquennium ended with that year, but being the lowest rate ever recorded there. For comparison the rates of the seven Australasian colonies for the year 1892 are here appended :—

Victoria .....	1·36	Tasmania .....	0·84
Queensland .....	1·02	Western Australia .....	0·84
South Australia .....	0·94	New Zealand .....	0·82
New South Wales .....	0·86		

*Cancer.*—The deaths from cancer (including malignant new growths) numbered 162 (83 males and 79 females), being less by 9 than those registered in 1893, but being, with that exception, the greatest number ever recorded in one year. The proportion of deaths from this disease per 1,000 of the mean population was 0·47, against 0·51 in the previous year.

For the last ten years the rates were as follows :—

1885 .....	0·32	1890 .....	0·41
1886 .....	0·34	1891 .....	0·49
1887 .....	0·36	1892 .....	0·45
1888 .....	0·38	1893 .....	0·51
1889 .....	0·43	1894 .....	0·47
		Mean of ten years .....	0·42

In England the proportion in 1892 was 0·69, which was above the mean annual rate (0·67) for the quinquennium ended with that year, and was the second highest rate ever recorded there. For comparison the rates of the seven Australasian colonies for the year 1892 are here appended :—

Victoria .....	0·59	New South Wales .....	0·43
New Zealand .....	0·48	Queensland .....	0·31
Sout Australia .....	0·45	Western Australia .....	0·29
Tasmania .....	0·45		

All the deaths in South Australia in 1894 from cancer, except 3, were of persons over 30 years of age. For some years the records of cancer have, on the whole been tending upwards, both in these colonies and in England. Referring to the increase in the latter country, the Registrar-General of England, in the Fifty-second Annual Report, states that some of it is attributable to increased accuracy in distinguishing and stating causes of death, but adds that "it must be admitted, as at any rate highly probable, that a real increase is taking place in the frequency" of cancerous diseases, including all malignant new growths.

*Diseases and Accidents of Pregnancy and Childbirth.*—The deaths ascribed to these causes, including puerperal fever, were 42, against 56 in the previous year. The proportion which deaths from these causes bore to 1,000 registered births was 4·01, against 5·24 in 1893. The following table shows the proportions in this colony, Victoria, and England in the years specified:—

	South Australian Rate.		Victorian Rate.		English Rate.
1882 .....	6·46	....	6·58	....	5·09
1883 .....	4·39	....	5·74	....	5·06
1884 .....	4·14	....	7·04	....	4·79
1885 .....	4·40	....	5·61	....	4·98
1886 .....	3·22	....	6·23	....	4·29
1887 .....	4·99	....	5·27	....	4·69
1888 .....	4·09	....	5·42	....	4·73
1889 .....	2·81	....	4·48	....	4·05
1890 .....	3·67	....	5·30	....	4·89
1891 .....	5·68	....	4·99	....	5·24
1892 .....	4·36	....	4·63	....	5·78
1893 .....	5·24	....	4·90	....	—
1894 .....	4·01	....	—	....	—
Mean.....	4·42	Mean....	5·52	Mean....	4·87

*Influenza, or La Grippe.*—The deaths from influenza in 1894 numbered 53, against 49 in the previous year.

*Infantile Mortality.*—The deaths of infants under 1 year of age numbered 984 (556 males and 428 females), against 1,245 in 1893, and were in the proportion of 9·39 to 100 births registered, which was below the rate of any other of the last ten years. From 1885 to 1894 the proportions were as follows:—

1885 .....	11·34	1890 .....	9·65
1886 .....	12·61	1891 .....	9·09
1887 .....	11·12	1892 .....	9·69
1888 .....	9·59	1893 .....	11·65
1889 .....	9·42	1894 .....	9·39

The most recent returns give the proportions in the other Australasian colonies as follows:—

	1894.		1894.
Western Australia .....	12·62	Queensland.....	9·79
New South Wales.....	10·92	Tasmania .....	9·39
Victoria .....	10·40	New Zealand .....	8·12

On the whole, the colonies stand well in regard to infantile mortality, since, according to the returns of the Registrar-General of England, the two lowest proportions known in that country since the introduction of registration were 13·00 in 1881 and 13·50 in 1879, while the proportion has in several years been over 15·00, and in some even over 16·00. For the quinquennium ended with 1892 the mean proportion in England was 14·56.

MARRIAGES.

The marriages registered in 1894 numbered 2,094, being less by 16 than those of the previous year, and being the lowest number recorded in any year since 1889. The marriage rate for the year (that is the rate of marriages, not of persons married) per 1,000 of the mean population was 6·09 against 6·27 in 1893, and was the lowest rate recorded for at least 20 years. The marriages in the first quarter numbered 596; in the second, 493; in the third, 485; and in the fourth, 520.

By means of the tabular statement which has been already referred to, and which will be found later on, the marriage rate of South Australia can be compared with the marriage rates of the other Australasian colonies, the different parts of the United Kingdom, and several other countries.

Table 13, accompanying this report, gives detailed information as to the ages of the persons married, and shows how many of them were bachelors or widowers, spinsters or widows, and how many were unable to write their names. The number of marriages celebrated during the year according to the ceremonies of each religious denominations and the number of civil marriages are shown in the following statement:—

Church of England.....	443	Presbyterian .....	99
Wesleyan.....	342	Church of Christ .....	56
Roman Catholic .....	258	Salvation Army .....	17
Primitive Methodist .....	176	Officiating Registrars .....	11
Bible Christian .....	165	Christian Brethren.....	9
Lutheran .....	147	Welsh Free Church .....	9
Registrar-General, Deputy Registrar, and District Registrars .....	134	Jewish.....	3
Baptist.....	121	Unitarian .....	2
Congregationalist .....	100	Free Presbyterian .....	1
		Moravian .....	1

A rise or fall in marriage rates, or in the value of exports or imports, is generally regarded as being in some degree indicative of a corresponding change in the prosperity of a country. The following table shows the variation year after year from 1881 to 1894 in such rates and values in South Australia :—

Year.	Marriage Rate per 1,000 of Mean Population.	Value per Head of Mean Population.		
		Imports Retained for Home Consumption.	Exports of South Australian Produce.	Imports and Exports United.
		£ s. d.	£ s. d.	£ s. d.
1881.....	8·31	16 1 3	13 2 5	29 3 8
1882.....	8·87	19 8 4	14 13 9	34 2 1
1883.....	8·64	16 14 5	11 17 4	28 11 9
1884.....	8·42	14 11 2	17 8 10	32 0 0
1885.....	7·93	13 15 11	14 4 2	28 0 1
1886.....	6·51	10 9 11	9 5 11	19 15 10
1887.....	6·48	10 4 0	10 19 5	21 3 5
1888.....	6·82	10 3 0	15 5 9	25 8 9
1889.....	6·69	10 10 4	11 19 10	22 10 2
1890.....	7·17	12 6 11	14 3 2	26 10 1
1891.....	7·31	13 0 11	14 16 0	27 16 11
1892.....	6·51	8 12 8	9 18 9	18 11 5
1893.....	6·27	8 4 5	9 15 11	18 0 4
1894.....	6·09	6 12 3	9 14 10	16 7 1

It is the opinion of statisticians that if through a series of years the number of marriages in each year be compared with the number of legitimate births in the following year a very fair estimate can be obtained of the average number of children born to each married couple. Although the figures of a long series of years are required to demonstrate the correctness of this opinion, it is generally only necessary to examine those of a few years to obtain estimates that may be relied on. The following figures show the proportions of births to each marriage in South Australia for nine years, in each instance the births compared being for the year given and the marriages for the year before :—

1886 .....	4·46
1887 .....	5·34
1888 .....	5·17
1889 .....	4·83
1890 .....	4·90
1891 .....	4·66
1892 .....	4·42
1893 .....	4·90
1894 .....	4·81
Mean .....	4·83

It would seem from these figures that 4·83 (nearly 5) is the average number of children born in South Australia to each marriage. This is above the average in England and Scotland, and below that in Ireland, and in the Australasian colonies is excelled only by the average in New Zealand (5·16). In Western Australia the average is 4·82; in Tasmania, 4·75; in New South Wales, 4·70; in Queensland, 4·62; and in Victoria, 4·19.

GENERAL RESULTS OF THE YEAR FOR THE COLONY.

Viewed as a whole, 1894 was not a favorable year with respect to either births or marriages; it was in regard to increase of population a better year than might have been expected, considering the great number of departures for Western Australia, while in reference to its death record it was one of the very best years the colony has ever known.

ADELAIDE AND SUBURBS.

As explained in the annual report for 1888, by “Adelaide and suburbs” is meant an area consisting of the four registration districts of Adelaide, Norwood, Hindmarsh, and Port Adelaide. Within this area (which is 262 square miles in extent) there are, in addition to the city of Adelaide, nine corporate towns, and many other towns and villages. The estimated population of Adelaide and suburbs on December 31st, 1894, was 142,663 (69,037 males and 73,626 females), being more by 2,114 than the estimated population at the beginning of the year. The estimated mean population for 1894 was 141,606 (68,646 males and 72,960 females). The births registered during the year numbered 4,340 (2,229 males and 2,111 females), being less by 228 than those recorded in 1893. The birth rate per 1,000 of the mean population was 30·65, against 32·94 in the previous year. It was higher by 0·16 than that of the whole colony, and higher by 2·37 than the birth rate of the city of Adelaide taken by itself. The deaths registered in Adelaide and suburbs in 1894 numbered 1,960 (1,064 males and 896 females) being less by 478 than those recorded in the previous year. The death rate per 1,000 of the mean population was 13·84 against 17·58 in 1893. It was higher by 2·20 than that of the whole colony, but lower by 5·63 than the death rate of the city of Adelaide taken by itself—that is, the city death rate, including all deaths in public institutions.

The following table shows the rates of infantile mortality in Adelaide and suburbs in the years specified—that is, the proportion of deaths of children under 1 year of age to 100 births registered :—

1886.....	15·75
1887.....	13·68
1888.....	11·58
1889.....	11·58
1890.....	11·95
1891.....	11·88
1892.....	11·79
1893.....	12·59
1894.....	10·60

It

It will be seen that in every one of these years the rate was higher than the corresponding rate for the whole colony shown in a previous table.

For comparison, the birth and death rates (inclusive of all births and deaths in public institutions) per 1,000 of the mean population of the capital cities and suburbs of the colonies and of several of the largest towns in Great Britain are hereby given. The figures for the British towns have been taken from the returns of the Registrar-General of England, while those for the colonial capitals have, for the most part, been extracted from special returns which, on application, were supplied to this office by the statistical authorities of the different colonies :—

	Births, 1894.	Deaths, 1894.		Births, 1894.	Deaths, 1894.
Adelaide .....	30·65	13·84	Greater London.....	29·6	16·5
Melbourne .....	30·94	15·55	Manchester.....	32·0	20·4
Sydney .....	31·65	14·12	Liverpool .....	35·4	23·8
Brisbane .....	31·80	11·43	Birmingham .....	31·7	18·6
Perth .....	39·02	21·75	Leeds .....	32·2	17·9
Hobart .....	29·08	17·91	Edinburgh .....	26·6	17·5
Wellington.....	28·59	11·43	Glasgow .....	32·9	19·8

There were 1,076 marriages celebrated in Adelaide and suburbs in 1894. The marriage rate (that is, the rate of marriages, not of persons married) per 1,000 of the mean population was 7·60, which was greater by 1·51 than the marriage rate for the whole colony.

CITY OF ADELAIDE.

The estimated population of the city on December 31st, 1894, was 40,167 (19,200 males and 20,967 females), being an increase of 418 for the whole year. The births registered numbered 1,130, being less by 55 than those of the previous year; and the deaths 778, being less by 202 than those of the previous year. In several of the numbered tables accompanying this report (particularly tables 21, 22, and 23) will be found statistics referring to the city.

The statistical authorities of the different colonies do not agree as to how far births and deaths occurring in public institutions, such as hospitals, asylums, gaols, &c., should be included, or whether any of them at all should be included, in the calculation of the birth and death rates of cities or other large towns. Nor, in reference to this matter, are they agreed as to what institutions should be comprehended under the description “public,” some giving a much wider meaning to the term “public intitutions ” than others do. The only comparison, therefore, that can conveniently be made between the birth and death rates of the city of Adelaide and those of other large colonial towns is one between the rates inclusive of all births and deaths in public institutions. The following figures show the rates per 1,000 of mean population in the towns named, exclusive of suburbs. They are in all cases the rates inclusive of all births and deaths in public institutions :—

	Births, 1894.	Deaths, 1894.
Adelaide .....	28·28	19·47
Melbourne .....	33·80	27·13
Bendigo .....	38·01	19·43
Ballarat .....	32·74	19·98
Geelong .....	34·28	18·18
Sydney .....	30·70	17·01
Hobart .....	29·18	16·36
Launceston .....	28·42	17·49
Wellington .....	28·25	11·82
Dunedin .....	22·14	11·38
Auckland .....	27·80	15·41

The marriages celebrated in the city of Adelaide in 1894 numbered 564. The marriage rate (that is, the rate of marriages, not of persons married) per 1,000 of the mean population was 14·12. It is probable, however, that not more than half the persons married in the city had their usual residence therein.

CORPORATE TOWNS.

In table No. 25 accompanying this report will be found the usual statistics with respect to the population, births, and deaths of twenty-three corporate towns, including the city of Adelaide. The birth and death rates per 1,000 of mean population in the towns referred to in the table, taken in groups, were as follows:—

	Births, 1894.	Deaths, 1894.
Municipality of Adelaide .....	28·28	19·47
Nine suburban corporate towns .....	30·39	11·47
Thirteen outside corporate towns .....	39·64	16·69
The twenty-three towns collectively .....	31·51	14·98

NORTHERN TERRITORY.

The following table shows the estimated population of the Northern Territory (exclusive of aborigines) in the year 1894 :—

	Males.	Females.	Persons.
Estimated population, January 1st, 1894 .....	4,533	363	4,896
Births during the year .....	16	7	23
Immigration during the year .....	184	40	224
Deaths during the year.....	4,733	410	5,143
	39	1	40
Emigration during the year .....	4,694	409	5,103
	369	52	421
Estimated population, December 31st, 1894 .....	4,325	357	4,682
Estimated mean population of the year .....	4,435	367	4,802

The following table shows the estimated population (exclusive of aborigines) divided into persons of European race and those of other races :—

	Males.		Females.		Total.
Europeans—January 1st, 1894 .....	1,149	....	298	....	1,447
“ December 31st, 1894.....	1,089	....	293	....	1,382
Asiatics (chiefly Chinese) and others—Jan. 1st, 1894..	3,384	....	65	....	3,449
“ “ “ Dec. 31st, 1894.	3,236	....	64	....	3,300

The births registered in 1894 numbered 23 (16 males and 7 females); the deaths, 40 (39 males and 1 female); and the marriages, 5. Of these the European births were 13 (9 males and 4 females); and the European deaths, 14 (13 males and 1 female). The general birth rate per 1,000 of the mean population was 4·79; the death rate, 8·33; and the marriage rate, 1·04. The European birth rate per 1,000 of the mean European population was 9·16; and the death rate, 9·87. No inference, however, of statistical value can be drawn from these rates, owing to the smallness of the numbers dealt with, and the abnormal state of the population in regard to the distribution of sex and of age.

The following table shows the causes of deaths in the Territory, arranged as nearly as possible in the usual nosological order of sequence, and the number and ages of the deceased :—

Causes of Death.	All Ages.			Under 1 Year.	1—5.	5—10.	10—20.	20—40.	40—60.	60—80.	80 and Up- wards.	Not Stated.
	Total.	M.	F.

COMPARATIVE STATISTICS.

The following tabular statement shows the rates of births, deaths, and marriages per 1,000 of mean population in the Australasian colonies, the different parts of the United Kingdom, and several other countries. The figures in the first seven lines have been taken from the returns of the statistical authorities of the different colonies named—for the most part from returns which, on application, were specially supplied to this office. The remainder of the figures have either been extracted unaltered or been deduced by calculation from the returns of the Registrar-General of England, who obtains his information respecting other countries from the several official authorities of those countries :—

		Births.	Deaths.	Mar- riages.			Births.	Deaths.	Mar- riages.
South Australia .....	1894	30·49	11·64	6·09	France .....	1892	22·1	22·6	7·6
Victoria.....	1894	29·17	13·14	5·99	The German Empire .....	1892	35·7	24·1	7·9
New South Wales .....	1894	31·48	12·30	6·20	Prussia separately .....	1892	36·3	23·4	8·0
Queensland .....	1894	31·86	12·08	5·70	Austria .....	1892	36·1	28·8	7·8
Western Australia .....	1894	27·49	13·99	6·11	Italy .....	1892	36·4	26·3	7·5
Tasmania .....	1894	31·11	12·42	5·42	Switzerland .....	1892	28·0	19·3	7·3
New Zealand .....	1894	27·28	10·19	6·15	Belgium.....	1892	29·1	21·7	7·7
United Kingdom (as a whole)...	1892	29·5	19·0	7·3	The Netherlands .....	1892	32·0	21·0	7·2
England and Wales.....	1892	30·5	19·0	7·7	Norway .....	1892	29·6	17·7	6·3
Ireland .....	1892	22·4	19·4	4·6	Sweden .....	1891	28·3	16·8	5·8
Scotland .....	1892	30·7	18·5	7·0	Hungary .....	1891	42·3	33·1	8·6

The rates for other European countries (Denmark, Spain, &c.) have not been given in this table, because in the returns accessible they are not calculated on mean populations, and no data are given by means of which this defect could be remedied. The deaths of French persons abroad, civil and military, are registered in France, and this may have the effect of causing the death rate there to be somewhat overstated. It will be seen that in the comparative statement as it stands South Australia shows the eleventh lowest birth rate, the sixth lowest marriage rate, and the second lowest death rate. If, however, the seven Australasian colonies alone are considered, South Australia shows the fourth highest birth rate, the fourth highest marriage rate, and the second lowest death rate.

The

The following table shows the estimated population in each of the seven Australasian colonies on December 1st, 1894. The numbers given are *exclusive of the aborigines*, except that in the case of New Zealand, over 2,000 half-castes, living as Europeans, are included :—

	Males.		Females.		Total.
New South Wales .....	669,181	..	575,248	..	1,244,429
Victoria .....	606,934	..	571,604	..	1,178,538
Queensland .....	250,834	..	194,321	..	445,155
South Australia, proper .....	179,442	..	168,278	..	347,720
“ Northern Territory ..	4,325	..	357	..	4,682

NOTE.—This table is intended to afford the means of comparing the weather and its changes with the general mortality, the mortality among young children and old people, and the mortality from certain diseases, the malignancy of which depends, it is believed, very much on the state of the weather.

G. H. AYLIFFE, Registrar-General of Births, &c.

Order of Fatality.	Causes of Death.	1894.			1893.	Order of Fatality.	Causes of Death.	1894.			1893.
		Total.	Under 5 years.	5 years and above.				Total.	Under 5 years.	5 years and above.	
1	Phthisis .....	356	6	350	340	45	Gout .....	7	—	7	6
2	Old age .....	282	—	282	318		Purpura, hæmorrhagic diathesis .....	7	2	5	1
3	Diseases of circulatory system (chiefly of heart) not separately classed .....	241	7	234	238		Dyspepsia .....	7	3	4	5
4	Pneumonia .....	216	88	128	330		Gallstones .....	7	—	7	4
5	Diarrhœa, dysentery .....	201	181	20	249		Diseases of uterus and vagina .....	7	—	7	9
6	Debility, atrophy, inanition .....	200	196	4	269		Caries, necrosis .....	7	—	7	15
7	Bronchitis .....	195	69	96	175		Diseases of organs of locomotion not separately classed .....	7	—	7	3
8	Cancer, malignant disease .....	162	2	160	171		Accidents not s-parately classed .....	7	4	3	13
9	Premature birth .....	108	108	—	127		Dropsy undefined or ill-defined .....	7	1	6	6
10	Apoplexy .....	100	2	98	79		Simple cholera .....	6	2	4	13
11	Enteritis .....	98	84	14	92		Syphilis .....	6	3	3	8
12	Diphtheria .....	97	58	39	100		Chronic alcoholism .....	6	—	6	9
13	Convulsions .....	95	93	2	133		Softening of brain .....	6	—	6	9
14	Enteric fever .....	80	2	78	62		Puerperal convulsions .....	6	—	6	3
15	Bright's disease .....	68	—	68	62	46	Placenta prævia, flooding .....	6	—	6	10
	Inflammation of the brain or its membranes .....	68	37	31	68		Poisoning (accidental) .....	6	—	6	10
16	Drowning (accidental) .....	63	12	51	36		Cut, stab (suicidal) .....	6	—	6	6
17	Whooping cough .....	60	56	4	121		Cyanosis .....	5	5	—	3
18	Fracture, contusion (accidental) .....	58	1	57	84		Idiopathic tetanus .....	5	4	1	4
19	Influenza .....	53	10	43	49		Senile gangrene .....	5	—	5	4
20	Endocarditis, valvular disease of heart .....	50	1	49	43		Uremia .....	5	1	4	2
21	Forms of tuberculosis not separately classed, scrofula .....	46	16	30	57		Simple and ill-defined fever .....	4	2	2	5
22	Insanity, general paralysis of insane .....	44	—	44	42		Laryngitis .....	4	4	—	18
23	Tubercular meningitis (acute hydrocephalus) .....	43	27	16	50		Intussusception of intestine .....	4	4	—	8
24	Dentition .....	42	42	—	73		Diseases of lymphatic system .....	4	1	3	4
25	Diseases of liver (except cirrhosis and gallstones) .....	36	11	25	33	47	Diseases of urinary system not separately classed .....	4	—	4	11
26	Scarlet fever .....	35	26	9	5		Ovarian diseases .....	4	—	4	6
27	Peritonitis .....	31	5	26	22		Cut, stab (accidental) .....	4	3	1	—
28	Burns, scalds (accidental) .....	29	12	17	12		Poisoning (suicidal) .....	4	—	4	9
29	Diseases of the nervous system not separately classed .....	29	6	23	39		Spina bifida .....	3	3	—	4
30	Measles .....	28	24	4	261		Laryngismus stridulus .....	3	3	—	1
31	Starvation, want of breast milk .....	24	21	3	28		Angina pectoris .....	3	—	3	6
32	Diseases of respiratory system not separately classed .....	24	11	13	32		Carbuncle .....	3	—	3	2
33	Epilepsy .....	23	2	21	24		Eczema .....	3	3	—	6
34	Disease of stomach .....	23	5	18	17		Murder, manslaughter .....	3	—	3	10
35	Diseases of bladder and of prostate .....	23	—	23	21		Drowning (suicidal) .....	3	—	3	8
36	Paralysis not separately classed .....	22	—	22	27	49	Thrush .....	2	2	—	9
37	Empysemæ, asthma .....	22	2	20	6		Delirium tremens .....	2	—	2	2
38	Ileus, obstruction of intestines .....	20	5	15	15		Paralysis agitans .....	2	—	2	3
39	Cirrhosis of liver .....	20	—	20	13		Pericarditis .....	2	—	2	3
40	Ill-defined and unspecified causes not separately classed .....	20	9	11	27		Stomatitis .....	2	2	—	4
41	Diabetes mellitus .....	19	—	19	14		Hæmatemesis .....	2	1	1	1
42	Syncope .....	18	1	17	14		Ulceration of intestine .....	2	1	1	3
43	Congenital defects, not separately classed .....	17	17	—	17		Stricture or strangulation of intestine .....	2	—	2	—
44	Tabes mesenterica .....	16	15	1	13		Addison's disease .....	2	—	2	2
45	Anæmia, chlorosis, leucocythæmia .....	16	3	13	10		Suppression of urine .....	2	—	2	1
46	Diseases of digestive system not separately classed .....	16	4	12	13		Urinary calculus .....	2	—	2	7
47	Croup .....	16	14	2	30		Abortion, miscarriage .....	2	—	2	4
48	Rheumatic fever, rheumatism of heart .....	15	1	14	16		Arthritis, osteitis, periostitis .....	2	—	2	2
49	Pleurisy .....	15	1	14	21		Phlegmon, cellulitis .....	2	—	2	2
50	Paraplegia, disease of spinal cord .....	14	2	12	4	50	Diseases of integumentary system not separately classed .....	2	2	—	—
51	Puerperal fever .....	14	—	14	19		Gunshot wounds (accidental) .....	2	—	2	7
52	Hemiplegia, brain paralysis .....	14	—	14	12		Suicides not separately classed .....	2	—	2	2
53	Atelectasis .....	12	12	—	6		Tumor undefined or ill-defined .....	2	—	2	3
54	Embolism, thrombosis .....	12	—	12	10		Abscess undefined or ill-defined .....	2	2	—	4
55	Accidents of childbirth not separately classed .....	12	—	12	19		Remittent fever .....	1	1	—	1
56	Acute nephritis .....	12	1	11	9		Gonorrhœa, stricture of urethra .....	1	—	1	3
57	Hydatid disease .....	11	—	11	11		Rickets .....	1	1	—	1
58	Rheumatism (except of heart and rheumatic fever) .....	11	—	11	4		Constitutional diseases not separately classed .....	1	—	1	7
59	Erysipelas .....	10	6	4	13		Imperforate anus .....	1	1	—	2
60	Hernia .....	10	—	10	13		Chorea .....	1	—	1	3
61	Gunshot wounds (suicidal) .....	10	—	10	11		Epistaxis and disease of nose .....	1	—	1	—
62	Pyæmia, septicæmia .....	9	1	8	11	51	Hypertrophy of heart .....	1	—	1	3
63	Aneurism .....	9	—	9	8		Diseases of larynx and trachea (except croup and laryngitis) .....	1	—	1	1
64	Suffocation (accidental) .....	9	8	1	16		Melaena .....	1	—	1	—
65	Hanging (suicidal) .....	9	—	9	5		Ascites .....	1	1	—	3
66	Otitis, otorrhœa, and disease of ear .....	8	2	6	2		Diseases of spleen .....	1	—	1	—
67	Sore throat, quinsy .....	8	6	2	3		Bronchocele .....	1	—	1	1
68	Sunstroke, heat-apoplexy, heat .....	8	6	2	5		Haematuria .....	1	—	1	—
69							Disorders of menstruation .....	1	—	1	—
70							Diseases of testes, penis, scrotum, &c. .....	1	—	1	—
71							Puerperal mania .....	1	—	1	—
72							Phlegmasia dolens .....	1	—	1	—
73							Ulcer, bed sore .....	1	1	—	1
74							Pemphigus .....	1	1	—	—
75							Lightning .....	1	—	1	—
76							Bite of snake or insect .....	1	—	1	—
77							Hanging (execution) .....	1	—	1	—
78							Hæmorrhage undefined or ill-defined .....	1	—	1	—
